INTERNATIONAL HAPPINESS DAY

The Department of Science and Humanities organized a special visit to Veda Old Age Home in Perungalathur to celebrate **International Happiness Day** on March 20, 2024. Following the motto that **"Trying to make others happy is a better way to one's own happiness,"** 2 faculty members and 30 first year students participated in this event. Dr. Arul Kulandaivel, HoD/S&H, led the initiative, while Dr. L. Parthiban, AP/Mathematics, coordinated the initiative. . Initially, the team received a generous contribution of Rs. 5191, which was utilized to provide meals for the residents, and the students conducted a few activities to entertain them and brought smiles all around, highlighting the beauty of spreading joy and kindness.

Abstract:

With the use of AI and digital forensics, this paper outlines a complete strategy for handling security incidents in the cloud. The research is meant to improve cloud-based security issue detection and response. The results indicate the promise of this integrated strategy, with AI models improving the accuracy of issue detection and digital forensics speeding incident triage. Improved cloud security, proactive threat detection, optimized resource allocation, and conformity with legal and regulatory standards are only some of the practical consequences discussed in the paper. Advanced AI models, automated incident response, human-machine cooperation, threat intelligence integration, adversarial machine learning, compliance and legal issues, and cross-cloud security are all areas the report suggests further investigation into. In sum, this study aids in developing a more proactive and resilient strategy for handling cloud security incidents in a dynamic digital environment
