"Exploring Divergent Thinking: A Mind Mapping Session by 3rd-Year Students"

The 3rd-year students engaged in an insightful session on Divergent Thinking, where they created mind maps to visualize creative problem-solving, idea generation, and innovative thinking processes. Their mind maps showcased unique perspectives, brainstorming techniques, and connections between ideas, highlighting the power of thinking beyond conventional boundaries. This session emphasized the importance of open-ended exploration and creativity in tackling complex problems.

The maps showcased how students branched out their thoughts in multiple directions, emphasizing:

1. **Idca Gckciatiok** – Techniques like brainstorming, random word association, and SCAMPER were widely used to foster creativity.
2. **Pioblc m-Solvikg** – Students explored unconventional solutions to problems, considering multiple possibilities rather than linear thinking.
3. **Ikkovatiok G Cícativity** – The maps highlighted how students linked diverse concepts to develop unique ideas.
4. **Collaboíatiok** – Many mind maps illustrated teamwork, where students built upon each other's thoughts, expanding their thinking capacity.
5. **Rcal-World Applicatioks** – Examples from industries like design, entrepreneurship, and engineering were incorporated to showcase the relevance of divergent thinking.

Overall, the mind maps demonstrated how students embraced open-ended exploration, leading to innovative ideas and multiple solutions to a given challenge.
